

## FEMA GLAZING – Materials Made in the USA – With Old Fashion Pride of Workmanship

There is a reason for our 20 plus year record without worries, such as defects, and delamination:

- Only USA products
  - **No** polycarbonate from CHINA
  - **No** adhesive from CHINA
  - And even **no** aluminum from CHINA
- Tried and true 20 plus year patented interlayer to bond polycarbonate to glass and other polymers
- Tried and true hand laid up and fabrication techniques, (no short cuts)
- Custom design solutions and manufacturing per project requirements

We produce FEMA Glazing, The Old Way, The Right Way.

Survivalite Impact Windows and Doors – with glazing by Saf-Glas

Designed, tested and built to last – and to Survive
